Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1,3, and 12 rejected under 35 U.S.C. 103(a) as being unpatentable over Lykes et al. (US 5068556) in view of Takahashi et al. (US 713915).

Regarding claim 1, Lykes et al. disclose (figures 4-6) an electrical machine, having a stator (25) which is received in a housing (28a) that is closed by a housing cap, and having a rotor (35) that includes a shaft which is rotatably received in roller bearings (34) characterized in that the roller bearings (34) are received by bearing rings (28), which are supported in the stator (25) of the electrical machine, stator (25) of the electrical machine, the stator is provided on its face ends with openings (26) for receiving the bearing rings (30), and the openings (26) are configured as annular grooves extending in a circumferential direction.

Takahashi et al. disclose the annular grooves (fig. 6, the groove form between winding and housing 110) are provided on an outer diameter of the stator (s).

It would have been obvious to one of ordinary skill in the art at the time the invention was made to modify the stator core of Lykes to accommodate the stator core having annular groove as taught by Takahashi et al. and in order to perform functionally and equally with the claimed invention.

Regarding claim 3, Lykes et al. disclose the bearing rings are made from a nonmagnetic material.

Regarding claim 12, Lykes et al. disclose the annular grooves (26) are provided in a stator opening for the rotor.

Conclusion

1. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
